A

Affected Environment	2-1
Agencies, Organizations, and Persons Receiving Copies of the Statement	6-1
County Officials.....	6-2
Federal Agencies.....	6-1
Interest Groups.....	6-5
Local and Regional Agencies	6-2
Local Libraries	6-6
Municipal Councils and Boards.....	6-3
State Agencies.....	6-1
Township Boards	6-4
Utilities and Railroads.....	6-4
Agricultural	2-34/4-10
Agricultural Lands Protection and Preservation	2-38/4-10
Agricultural Soils	2-35/4-13
Characteristics.....	2-34
Drainage and Irrigation	2-37/4-17
Farm Operations	2-34/4-10
Impacts.....	4-10
Measures to Minimize Harm	4-19
Air Quality.....	2-43
Attainment Status.....	2-44
Carbon Monoxide Analysis	4-23
Conformity.....	4-31
Index	2-45
Mobile Source Air Toxins	4-26
Monitoring	4-23
National Ambient Air Quality Standards.....	2-43
PM _{2.5} and PM ₁₀ Non-Attainment and Maintenance Areas, Hot-Spot Analysis	4-24

B

Background of Project.....	1-1
Existing and Future Conditions	1-4
Project History	1-1
Regional Planning Context.....	1-3

C

Commitments for Mitigation.....	4-128
Agricultural Field Tiles.....	4-131
Aquatic Resources	4-128
Multi-Use Path.....	4-133

Water Resources	4-129
Wetlands	4-128
Cumulative Impacts (see Indirect and Cumulative Impacts)	
Comments and Coordination	7-1
Congestion Management Alternatives	3-5
Cultural Resources	2-40/4-20
Archaeological Resources.....	2-40/4-21
Coordination with the State Historic Preservation Officer and Native American Tribal Organizations.....	4-23
Historic Resources	2-42/4-22

D

Detailed Build Alternatives	3-39
Cost and Right-of-Way Required	3-48
Design Characteristics	3-40

E

Economics	2-8/4-4
Energy Use	4-39

F

Floodplains	2-88/4-68
Encroachment and Additional Impervious Area.....	4-68
Impacts.....	4-68
Mitigation.....	4-71

I

Indirect and Cumulative Impacts.....	4-91
Avoiding, Minimizing, and Mitigating Indirect and Cumulative Effects	4-125
Cumulative Impacts	4-121
Indirect Impacts	4-110
Laws, Ordinances, and Programs for Environmental Protection and Land Use Control	4-107
Methodology for Impact Assessment	4-92
Scoping	4-95
Study Area Characteristics.....	4-98
Trends	4-100
Irreversible/Irretrievable Commitments of Resources which would be Involved with the Proposed Action	4-134

N

Natural Resources.....	2-45/4-39
Ecological Resources.....	2-54/4-44

Geology.....	2-47/4-40
Illinois Natural Areas.....	2-71/4-56
Threatened and Endangered Species.....	2-65/4-52
Need for Project.....	1-4
Access to Regional Jobs.....	1-14
Local System Deficiencies.....	1-12
Regional Mobility.....	1-5
Safety.....	1-17
No-Action Alternative.....	3-1
Noise Impacts.....	4-31
Abatement for Project.....	4-36
Abatement Criteria.....	4-32
Abatement Policy.....	4-32
Ambient Measurements.....	4-33
Analysis Methodology.....	4-33
Fundamental Concepts of Highway Noise.....	4-31
Noise Model Impact Results.....	4-33

P

Parks and Recreation/Special Lands.....	2-102/4-83
Permits and Certifications.....	4-83
Preparers.....	5-1
Federal Highway Administration.....	5-1
Huff & Huff, Inc.....	5-6
Illinois Department of Transportation.....	5-1
Images.....	5-8
Parsons Brinckerhoff Quade & Douglas, Inc.....	5-3
Public Communications, Inc.....	5-7
Smith Engineering.....	5-8
The al Chalabi Group, Ltd.....	5-6
Project Background.....	1-1
Project Need.....	1-4
Project Purpose.....	1-1

R

References.....	B-1
Relationship between Local Short-Term Uses of Man’s Environment and the Maintenance and Enhancement of Long-Term Productivity.....	4-134

S

Scoping.....	7-2
Environmental Resource and Regulatory Agency Scoping.....	7-2
Other Stakeholder Scoping.....	7-3
Selection of Detailed Build Alternatives.....	3-8
Detailed Build Alternatives.....	3-31
Findings.....	3-29

Functional Evaluation (Travel Benefits).....	3-15
Identification of Initial Alternatives.....	3-9
Locational Evaluation (Environmental Impact Potential).....	3-25
Social/Economic.....	2-1/4-1
Community Changes.....	4-3
Economic	2-8/4-4
Environmental Justice.....	4-3
Highway and Other Transportation Data.....	2-19
Housing Characteristics	2-7
Land Use Plans	4-9
Local Planning	2-24
Neighborhoods and Development Concentrations	2-13
Non-Highway Transportation Impacts.....	4-8
Population	2-3
Public Facilities/Services	2-15/4-8
Relocations.....	4-2
Special Waste	2-100/4-79
Hazardous Waste/CERCLIS Sites	2-100/4-81
Non-CERCLIS Sites	2-100/4-82
Stakeholder Involvement.....	7-4
Activities	7-4
Agency Coordination (Local, State, and Federal)	7-7
Corridor Planning Group	7-5
Design Development for the Detailed Build Alternatives and DEIS Preparation	7-24
Detailed Build Alternatives Selection.....	7-15
Elected Officials Coordination	7-9
Focus Groups	7-9
Interest Groups.....	7-9
Other Activities.....	7-13
Processes and Outcomes	7-15
Public Information Meetings	7-12
Purpose and Need Determination	7-15
Technical Advisory Group.....	7-4
Summary of DEIS	iii
Affected Environment.....	iii
Alternatives	viii
Environmental Consequences.....	xi
Issues with Other Agencies, Major Unresolved.....	xix
Other Federal Actions Required for the Proposed Action	xix
Other Proposed Actions	xix
Public Involvement.....	xviii
Purpose and Need for the Action	iii

T

Transportation System Performance (Future) of Detailed Build Alternatives	3-33
Access to Regional Jobs.....	3-37
Local System Deficiencies.....	3-36
Regional Mobility	3-34
Safety	3-37

V

Visual Resources	2-102/4-84
Impacts	4-84/4-85
Landscape Units and Districts	2-105
Mitigation of Impacts.....	4-88
Regional Landscapes	2-104/3
Viewers	2-109
Viewshed	2-110

W

Water Resources/Quality.....	2-73/4-58
Ponds.....	2-88
Stream Characteristics	2-73
Surface Water Impacts.....	4-59
Vegetated Shallows.....	2-87/4-68
Wetlands.....	2-88/4-72
Affected Wetlands	4-73
Avoidance and Measures to Minimize Harm	4-78
Characteristics.....	2-91
Functions.....	2-99
Functional Impacts.....	4-77
Maintenance Impacts	4-77
Mitigation.....	4-78
Operational Impacts.....	4-76
Plant Communities.....	2-97
Wetland 50-Fox River Seep Complex Impacts.....	4-75
